

Private Online Photo Albums

Emailing Links to your Guests

We use an app by ShootProof to create private online albums for all guest photos. At our viewing stations, we take each guest's email address so that we may send them a link to their photos. Below is a sample of the email that they will receive, and explanations of what is customizable.

SUBJECT LINE

Customizable text

FEATURED PHOTO

Guests will see one of their photos featured here.

LOGO

Your logo appears here. It is highly recommended that it be a horizontal version of your logo

HEADLINE

Customizable text

ALBUM LINK

This button takes guests to a private album of their photos. (See next page)

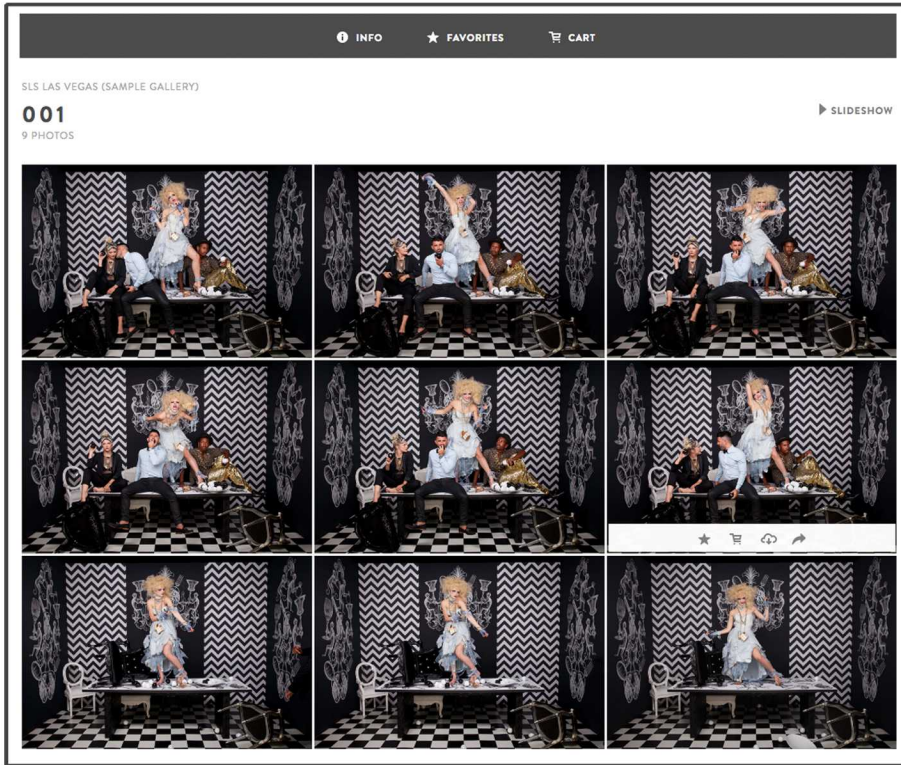

BODY OF EMAIL

This text is customizable as well, and is where you can suggest hashtags, etc.

Please send us any text you'd like us to use for the subject line, headline, and body of the email so that we can send you a sample for your approval. Make sure you send us your logo as well!

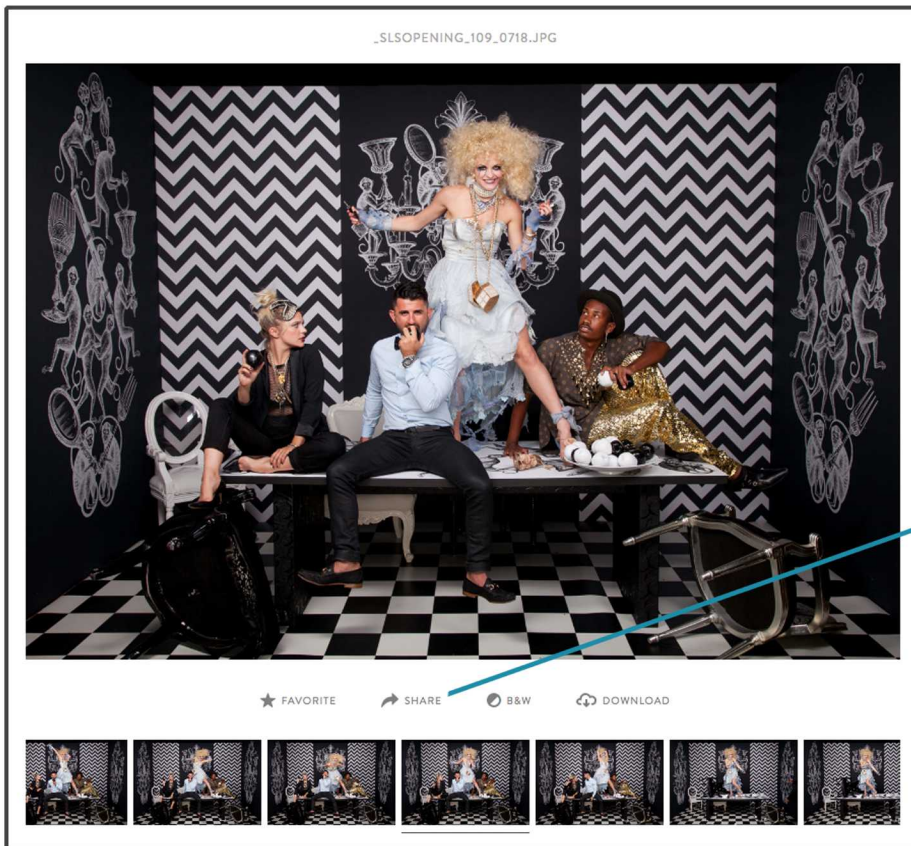

Guest's Private Online Photo Albums

Guests are emailed a link to their private online gallery, as seen below.

ALBUM VIEW

Each group of guests receives a private online album showing thumbnails of only their photos.

GUEST OPTIONS

When guests click on a photo, they are given options to download a full resolution file of their photo, order prints, or post onto facebook, twitter, or pinterest.

For other social media platforms like instagram, guests may simply download the photo to their phone then post wherever they like.
